

## Extract. Analyze. Compare. Catch Mistakes.

### Overview

Magic Placement automates the comparison of quotes, binders, and policies so agents, brokers, and wholesalers can identify discrepancies, ensure consistency, and save time by replacing manual, error-prone review processes with an AI-powered comparison engine.

By intelligently flagging mismatches, material differences, and subtle wording changes, Magic Placement ensures that what's requested is exactly what gets issued, minimizing dangerous mistakes and reducing E&O exposure.

### Capabilities

Compare quotes, binders, and policies side-by-side to identify mismatches in key terms like limits, deductibles, and exclusions.

Analyze documents thoroughly and decode complex policy language using AI to ensure alignment with client requirements, coverage needs, and broker specifications.

Apply tailored checklists and business rules, and automatically flag key differences between fields and policy language for faster, more informed decision-making.

Leverage advanced LLMs to extract critical fields from quotes, binders, and policies and convert them into standardized formats for easy review and use.

### Features

- Side by side Multi-carrier quote comparison
- Full traceability of extracted data
- Fuzzy match vs. material match
- User-Friendly UI
- Instant alerts, reminders and compliance checks

### The Magic Process

## The Magic Process

**Ingestion:** Ingest quotes, binders and policies in various formats via email, APIs, cloud storage (S3), and manual uploads, making document processing seamless and flexible.

**Extraction:** AI models extract data from the documents with every extracted data point linked back to its exact location in the original document, ensuring full transparency and compliance.

**Comparison:** Compare documents side by side and catch errors, mismatches, and nuanced changes in terms, conditions, and policy wording.

**Communicate:** Notify agents, brokers or carriers of required corrections through automated emails, alerts or task assignments.

## Benefits

### 75% Reduction in Document Review Time

Magic Placement reduces quote, binder, and policy comparisons from 4–6 days to under 1 hour, enabling faster decisions, quicker policy issuance, and greater broker satisfaction.

### 40% Increase in Productivity

Eliminate redundant tasks with AI-driven automation, enabling agents and brokers to focus on risk assessment, boosting competitiveness, increasing quotes reviewed, and driving higher conversion rates.

### Reduction in Missed Coverage Gaps and Pricing Errors

AI-powered comparison ensures that 100% of policy terms are reviewed consistently, reducing underwriting errors, lowering loss ratios and policy disputes.

### 30% Cost Savings Through Scalable Operations

AI-driven automation enables agents and brokers to scale efficiently without increasing headcount—reducing operational costs while maintaining high service levels.
